Why MJF?

Directpartsolution.com

Let's develop and learn about MJF together

About

I have worked in the manufacturing industry for more than 12 years in a variety of roles but have found my true passion in facility's management.

As well as the smooth day-to-day running of the facility, I keep a tight watch on budgetary responsibilities and duties around optimizing operational efficiency. Since joining Direct Part Production I have been involved in ongoing site planning and implementing the facility infrastructure and utility systems.

Strong and assured on:

- Review and monitoring of current processes to optimize efficiency
- Scheduling of routine maintenance
- Troubleshooting any issues with the plant utility systems
- Writing of internal SOPs for relevant areas
- Analysis of potential improvements
- Design of new processes or procedures across the facility
- Oversight of improvement or installation projects
- Responsibility to ensure plant utility systems meet internal standards and external regulatory requirements

In my spare time, I enjoy meeting up with my friends and family, and I currently volunteer as a guest columnist for my local paper, The Daily Herald. I also enjoy reading business and economics magazines
