for our customer so what new for you?

About

Highly passionate, knowledgeable, and determined individual with a background in optimising process for cost and quality.

Excellent analytical skills including developing, configuring and optimizing industrial processes from inception through to start up and certification.

Undertaking operational level reporting metrics, delivering multi-national level projects, with customer obsession at the heart of every business decision.

My inspiration is the Jazz saxophonist Charlie Parker or the "Yardbird" as he was known His saying was, "You've got to learn your instrument." Due to this I play saxophone in our cool Jazz band "The Jazz Pineapple Band"

I feel like the quote from Arthur C. Clarke "Any sufficiently advanced technology is indistinguishable from magic" is right on the money with what we do!
